

Diamond Double Gate Fold Basic Tutorial

1. Cut your designer paper 5 ½" x 12".
2. Score designer paper at 2", 4", 8", 10".
3. Fold designer paper along score lines. The two outside score marks should be mountain folds and the two inside score marks should be valley folds.
4. On both short sides of the designer paper measure down 2 ¾" and make a light mark with a pencil. You will now cut from the top at the closest score mark diagonally to the pencil mark.

5. Close the card to make sure that the front sections meet and that there are no gaps. You can refold your score marks if necessary.

6. In the second picture above I've labeled the corners that I cut off as A and B. You will now flip the cut off corners to the other side of the designer paper shows. You will then adhere the cut corners to the front flaps of the corners keeping the "A" corner on side "A" and the "B" corner on side "B".

7. The base of your Diamond Double Gatefold Card is done. Now it's time to decorate!
